Academic Program Description Guide

The curriculum

For the Department of Banking and

Finance for the academic year 2024-2025

41	

An educational program is a coordinated and organized package of courses that include procedures Experiences are organized in the form of study modules, the main purpose of which is to build and refine the graduate's skills through procedures. And the program qualifies them to meet the requirements of the labor market, which is reviewed and evaluated annually through auditing. Internal or external such as the External Examiner Program. The academic program description provides a brief summary of the main features of the program and its courses, indicating the skills The skills that students are taught are based on the objectives of the academic program. The importance of this is evident in: Description: It represents the cornerstone of obtaining program accreditation and is co-written by Teaching staff under the supervision of scientific committees in the scientific departments. This guide, in its second edition, includes a description of the academic program after updating the vocabulary and paragraphs of the guide. Previous in light of the developments and changes in the educational system in Iraq, which included a description of the program The academic system in its traditional form (annual, semester) in addition to adopting the generalized academic program description M/3 2906 on 5/3/2023 regarding the programs approved pursuant to the letter of the Department of Studies T

Academic and curricula to ensure the smooth running of the educational process.

The Bologna Process is the basis for its work, and in this area we cannot but emphasize the importance of writing program descriptions.

1. Program vision

The Department of Banking and Finance seeks to create an environment capable of enriching university life by building capacities, developing, and preparing financial and banking cadres through its modern academic programs and scientific expertise. These highly qualified cadres will actively participate in developing and highlighting administratively qualified levels in the financial and banking sectors.

.2 Program message

The department works to provide scientific, research, advisory and educational services in accordance with the current and future needs of society and seeks to develop the knowledge base in the field of financial and banking sciences in general and the private sector in particular in order to increase its contribution and role in the country's economy. 3. Program Objectives

- A- Preparing specialized cadres in financial and banking sciences capable of serving the government and private sectors and subsequently the community.
- B- Providing research, consultations, and financial and banking feasibility studies to solve practical and technical problems needed by governmental and private institutions and projects.
- C- Working to develop the banking system, financial markets, tax system, and other financial institutions operating in the country.
 - D- Spreading financial and banking awareness in the community.
 - E- Seeking to invest in joint cooperation relations between the scientific departments corresponding to the department in research and postgraduate studies
 - Developing and enhancing the financial and banking skills and capabilities of the department's graduates.
 - Z- Instilling good values and morals in students and avoiding wrong and unethical behaviors.

4. Program Accreditation

The accreditation application has been submitted

-9 Teaching and Learning Strategies The student acquires knowledge and understanding through: A- Direct teaching strategies: The role of the university professor in direct teaching strategies is to organize and control the educational process Mcomprehensively, including planning, implementation, and follow-up, while the role of the learner is limited to On receiving only, examples of which include listening to educational lectures. B - Indirect teaching strategies: The university professor performs indirect teaching strategies effectively, and focuses primarily on: Active Active in managing the educational process, as the learner is role Learning Processes Brainstorming strategies. m, and examples of this are: C- Directed Learning Strategies: In directed learning strategies, the university professor plays an active role in Managing the educational process as well, as the learner Active and effective during it, but it focuses on each of the processes discovery-driven Learning strategy M and its products, examples of which are: D- E-learning strategy: It is the most important educational strategy. There are many important and effective educational strategies. The use of modern Which technological means has become a modern revolution in technological development. Our world is currently experiencing an urgent necessity for the success of the educational process and keeping pace with what is called modern education. Father and entertainer This strategy allows greater scope for learners to participate in the educational process in an attractive way. Creative and innovative For them, it also unleashes self-development and learning. who Cooperative small group work of learners E - Cooperative learning strategy: The learning strategy includes: Who has the capabilities With each other to accomplish a specific task, one of the most prominent advantages of this strategy is that it includes learners. Different scientific topics within different groups, which gives them a better opportunity to exchange knowledge and skills. And benefit from each other. Who is focused and delving into it? And - the strategy of learning by imagination helps the learning strategy m imaginative On the topic at hand, by forming a mental image of the topic when hearing its description. This strategy can be implemented using various audio-visual means, such as displaying pictures, video clips, graphs, mind maps, and listening to audio clips.

-10 Assessment Methods

Students' knowledge and understanding are assessed through

evaluation.

A- Practical tests: The tests conducted by the university professor are one of the traditional methods of knowing

The student's mental level and the extent of his comprehension of the scientific material.

B- Research: Increasing the student's skill in the field of scientific research, solving problems, and finding solutions is one of the important means of

- C- Reports: Writing scientific reports, using methodological sources, writing them in a scientific style, and presenting them in the classroom is one of the main means of learning and assessment
- **D- Intellectual questions:** The university professor poses intellectual questions during the lecture, manages the discussion between the students, and learns about the extent of their thinking and levels. This is one of the main methods of evaluation
- E- **Final project :** The student is assigned a final project independently, based on the academic topics. This is a good opportunity to demonstrate what has been learned and apply it.

Professional

Development Orientation for New Faculty Members

In the Department of Banking and Finance, new faculty members are developed and advanced through holding seminars, workshops, and training courses under the supervision of the department's competent professors.

Professional development for faculty members

Many seminars, workshops, scientific discussions, conferences and training courses are held.

-12 Acceptance Criteria

Central Admission

-13 The most important sources of information about

the program: The Central

Admissions Guide The official department page on the Internet

-14 Program Development Plan

Program Development The Department of Banking and Financial Sciences seeks, through the prepared plans, to expand the acceptance of the increasing number of students and to open postgraduate program

Developing and training the teaching staff by providing an appropriate educational environment for the professional development of faculty members in the Department of Finance and Banking, in addition to holding seminars, scientific visits, and workshops.

Scientific discussions and participation in conferences.

Evaluation and Continuous Improvement The Department of Banking and Finance works to establish performance evaluation standards, involve students and stakeholders from the private sector in the evaluation process, and monitor graduates and labor market needs to narrow the gap between the academic side and financial institutions, government, commercial, and Islamic banks through continuous improvement of the academic program, to ensure that graduates find job opportunities that match their acquired abilities and capabilities.

Infrastructure and Resources The Department of Banking and Finance continuously seeks to provide a suitable infrastructure for students, including furnished and air-conditioned classrooms and computer labs, and to provide modern resources for students.

Postgraduate and undergraduate students .

Integrating practical experience: The Department of Financial Sciences is constantly working to enhance the academic (theoretical) aspect with the practical field aspect through field visits to governmental and private financial and banking institutions, in addition to holding seminars for external lecturers (managers and officials in the banking sector and financial institutions), as well as holding workshops and seminars.

Course Description for the Second Stage/First Course

1. Course Name :
Financial Managen
.2 Course code
.3 Semester/Year:
First Course / 2023
.4 Date of preparation of this description:
2024/3/17
5. Available forms of
attendance:
In-person . 6. Total number of study hours/number of
units (total) 30 hours/30
7. Name of the course supervisor - (If more than one name is mentioned)
Name: Dr. Ali Abdul Amir Flaifel
Email: alif.kadhim@uokufa.edu.iq
8. Course objectives
1. Realizing the role of financial management in solving the problems of private sector organizations.
2. Knowing the methods that help organizations in making investment decisions.
3. Identify the various financial crises facing business organizations and how to address them. Course objectives
Finding appropriate solutions for them. Academic
activity 4. Achieving the organization's activity by finding the best opportunities that suit it.
Organized by financial analysis.
9. Teaching and learning strategies
Strategy scussing the role of financial management and linking it with other sciences and how to use financial analysis methods to measure and increase the
panization's profitability, address its weak areas, increase its profits and the strength of its commercial activity in order to achieve high competitive strength and increase
market share. How to study its impact in developing effective plans to increase investment opportunities and achieve profits for the business
organization, and find possible solutions by analyzing it using financial methods.

Course Description Phase III

	-
1. Course name :	
Econometrics and Finance	
.2 Course code	
FBB 605	1
.3 Semester/Year:	
First course 2023/2024	
.4 Date of preparation of this description:	Ī
1/1/2023	
: .5 Available forms of attendance	
Regular attendance	
6. Total number of study hours/number of units (total)	
30 hours 30/unit	7
7. Name of the course supervisor - (If more than one name is mentioned	
Name : Prof. Dr. Haider Jawad	
Kazem Email: haiderj.kadum@uokufa.edu.iq	
8. Course objectives	
-1 The student will be introduced to the concept of econometrics and its mathematical and statistical	1
methods2 The student will be introduced to the types of	
econometric methods3 The student will be provided with scientific knowledge about the concept of financial	
variables and the factors affecting them4 The student will be introduced to how to build a model consisting Course objective	38
of financial variables as an independent and dependent variable5 The student will be introduced to statistical tests and their Academic	
tools to benefit from them in supporting econometrics6 The student will be provided with scientific and practical knowledge in the field of economic measurement7 The student will be introduced to how t	n choose the h
scientific and practical knowledge in the field of economic measurement7 The student will be introduced to now t	choose the b
9. Teaching and Learning	
Strategies -1 Preparing mathematical and statistical steps. Strategy -2	1
Designing a realistic model for the social sciences3 Finding	
data taken from the practical situation4	
Financial analysis and its	
methods5 Data analysis regarding the selection of a	
standard model6 Practical application of modern scientific systems and methods in the	
field of econometrics. Course Structure	

Assessment Met	nod Learning Method	Name of unit or topic	Week Hours Required Learni	ng Outcomes	What is
Tests, Assessment Lect	re, Discussion, Self and		Econometrics, Purposes	2	.1
Peer Assessment	Groups		of Econometrics, Components		
Peer and Self-Sma	II Dialogue		of Econometrics General		
Assessment		Concepts Econometrics	(Economic theory, facts and		
			data, their types and properties,		
			standard and		
			statistical methods).		
Tests	Presentation	Objectives of econometrics and	The student should know that	2	.2
16313	Presentation	its relationship to other sciences	econometrics has a close relationship		ے.
	small groups	no relationship to ether selences	with economic theory,		
			·		
			mathematical economics,		
			economic statistics, and		
			mathematical statistics, and that		
			these branches complement each		
			other in order to provide numerical		
			values for the parameters of variou	s economic varia	bles.
	practical		The purpose of the model is to estimate	2	.3
	demonstrations, lecture,		numerical values for the		
Tests, self-assessment	discussion, brainsto	rming	parameters of the relationship		
and peer assessment			between economic variables in		
Peer and Self-		Types of standard forms	order to predict or analyze an economic		
Assessment			structure or evaluate an economic		
			policy. An economic model uses mathematical symbols and relationships	to represent it	
			mathematical symbols and relationships	to represent it.	
Tests, seminar	Small	Form preparation stages	Econometrics (applied) is	2	.4
presentation	groups, current		concerned with measuring the		
Seminar	study, lecture,		parameters of the model used in		
Presentation	discussion		estimating and predicting		
			the values of economic variables.		
			This requires following a specific		
			methodology in research,		
			because the relationship between		
			economic variables is causal,		
			in meaning that a change in some	variables cause	s an effect.
			Other variables		
Tests	Lecture, Dialogue, Cha	pter Two / Linear Regression The S	Simple Linear Model: Simple	2	.5
	l	Small Squares, Model with and wi			.5
	Small Parameters)		secant, coefficient of determination, process		
	properties		Estimates, distribution of		
			model indicator		
			estimates in both cases,		
			hypothesis testing: t-test, analysis		
			of variance table, F-test,		
			normal distribution test for		
			random terms, stability		
			test of indicator estimates, fo	rmula test	

	3	ii t	Model. Examples and computer applications	s.	
closed – book Exam		First monthly test	First exam	2	.6
homework Homework assignments	Discussion Dialogue, Presentations - Process, small groups M	ethods of Estimating the Linear Model	Identify estimation methods and techniques, compare quantitative and qualitative methods, describe and evaluate quantitative m	2 ethods.	.7
Tests, Homework, Brain Homework assignments		Concept of linear model hypotheses	Describe the types of tests, understand their components, and identify the factors affecting them.	2	.8
Tests, homework Homework assignments	lecture, dialogue, brainstorming, discussion	Statistical tests	After estimating the parameters of the regression model, we must evaluate the estimated regression model by conducting economic and statistical significance tests for the results of the model.	2	.9
Tests, Presentation Seminar presentation Seminar Presentation	lecture, discussion, Dialogue, case study	Standard error/t test R-test/adjusted coefficient of determination	Statistical tests	2	.10
Objective questic Objective Test items			arizing the results begins with a case study table, analysis of variance dialogue, brainstorming for each Through it we test the morality of The model	2	.11
Objective que Objective Test items	Small groups sti wis cussion, dialogue, scientific presentation	Linear Regression Model	The previous simple linear regression model must be expanded to include the regression of the dependent variable (y) on several independent variables (). This is called the multiple	2 a linear regress	.12
	e, Presentations, Science rming, Statistical Tests o	f the Mental Model, Dialogue Linear/correlation coefficient	Learn about multiple linear model tests and the tools used to calculate correlation.	2	.13

Objective qu Objective Test items	Presentation estiongesentation discussion, dialogue brainstorming	Chapter Five / Econometric Problems	Ability to identify problems that arise after selecting the model	2	.14
closed – book Exam	×	Second month test		2	.15

.11 Course Evaluation					
	. 11 Course Evaluation				
The course is delivered in a learning environment rich in interactive lectures, including scenario analysis, problem-					
solving skills, workshops, and self-learning and e	experience in dealing with course topics. It also includes the				
student's self-assessment. And teamwork. The course is assessed in the					
	following areas:				
-1 Preparing reports					
Giving presentations2					
Case study.					
Tests and exams.					
It is based on	a combination of individual and group work. The evaluation may be done by us.				
	12 Learning and Teaching Resources

2- Course specific skill objectives:	- monvaning students to produce intellectual and inflovative ideas based on the sciences they have learned.	
2- Course specific skill objectives:		
	2- Course specific skill objectives:	

Activating the student's manual and motor skills related to the use of tools and devices, such as computer use and software design. 3- Emotional and value-based goals: Activating the emotional aspects of students, which include attitudes and values. The following is a statement of the objectives related to emotional and value-related aspects. Improving student reception by making them interested and listen attentively to the knowledge being presented. - Stimulating students' response through initiative, participation, and cooperation among them. Creating value in the student by making him defend what he is certain of knowing and believing in and respecting trends. Different. - Making the student able to organize, choose, make decisions and issue judgments. - Making students adhere to values. .36 Teaching and Learning Strategies The assessment strategy is used during the study period to motivate learners to keep up with knowledge and is based on the results of tests in written examinations at the individual and workshop levels. That's our assessment Which is at the level of multiple student groups and assessing the level of student awareness based on His opinions show the extent to which the required outputs are available for studying the curriculum he has, and the research or reports that the student may be required to produce are evaluated, all of this and other matters that are built upon. In achieving the above goals In the ultimate pursuit of it Final assessment of the student We also seek to develop the curriculum by integrating modern programs with the subject's vocabulary in a more in-depth manner. Strategy In order to develop the physical skills of the student in terms of working with programs related to administrative accounting, this in turn requires providing a computer lab in larger numbers than the available ones to be able to allocate a calculator to each student, and all of this is in the event that it is possible to return to in-person attendance. Course structure Name of unit or topic Week Hours Learning Criteria Required **Evaluation method** Learning method

Among this main goal, we mention the following goals 1- Cognitive objectives - Making the student able to remember and repeat the information previously learned. Presenting the curriculum vocabulary in a way that is compatible with the learner's understanding make the student able.
.44 Course objectives Course objective	This course aims to provide the student with the knowledge required to qualify him scientifically and physically. The responsibility of which fallson her to delve into the field of work related to management accounting Emotionally, providing sufficient support to the management of organizations in making various decisions. Among this main goal, we mention the following goals 1- Cognitive objectives - Making the student able to remember and repeat the information previously learned. Presenting the curriculum vocabulary in a way that is compatible with the learner's understanding and the student able to support or refute an idea or opinion or issue a judgment in light of the principles.

Activating the student's manual and motor skills related to the use of tools and devices, such as computer use and software design. 3- Emotional and value-based goals: Activating the emotional aspects of students, which include attitudes and values. The following is a statement of the objectives related to emotional and value-related aspects. Improving student reception by making them interested and listen attentively to the knowledge being presented. - Stimulating students' response through initiative, participation, and cooperation among them. Creating value in the student by making him defend what he is certain of knowing and believing in and respecting trends. Different. - Making the student able to organize, choose, make decisions and issue judgments. - Making students adhere to values. .45 Teaching and Learning Strategies The assessment strategy is used during the study period to motivate learners to keep up with knowledge and is based on the results of tests in written examinations at the individual and workshop levels. That's our assessment Which is at the level of multiple student groups and assessing the level of student awareness based on His opinions show the extent to which the required outputs are available for studying the curriculum he has, and the research or reports that the student may be required to produce are evaluated, all of this and other matters that are built upon. In achieving the above goals In the ultimate pursuit of it Final assessment of the student We also seek to develop the curriculum by integrating modern programs with the subject's vocabulary in a more in-depth manner. Strategy In order to develop the physical skills of the student in terms of working with programs related to administrative accounting, this in turn requires providing a computer lab in larger numbers than the available ones to be able to allocate a calculator to each student, and all of this is in the event that it is possible to return to in-person attendance. Course structure Name of unit or topic Week Hours Learning Criteria Required **Evaluation method** Learning method

Course description for the stage

<u> </u>	
	1. Course Name :
Econ	omic Feasibility Studies
	.2 Course code
	.3 Semester/Year:
	2023-2024
.4 Date of prep	paration of this description:
	- 3 - 18
5. Available	forms of attendance:
Daily attendance	in the classroom . 6. Total
number of study hours/number of units (to	otal) 45 hours (three
hours per day)	
7. Name of the course supervisor - (If more the	
Ghali Rahi Email: muhammedh.riha@u	d) Name : Dr. Muhammad okufa.edu.ig
	8. Course objectives
Teaching students in the specializations of finance, banking, business administration, accounting, and other related specializations at the university, by providing them with information, knowledge, and skills related to economic and technical feasibility studies for proposed investment projects, to demonstrate their suitability for the economic and financial policies of the business institution, and to demonstrate their efficiency in employing, investing, and developing their funds, leading to raising the level of their contributions to the national income, ensuring the continuity of their flows to meet the needs of individuals and various organ	Course objectives Academic izations in society.
9. Teaching a	and learning strategies
	Strategy
.1 Understanding and Knowledge	
• Demonstrates understanding of the financial and business sciences necessary to develop himself professionally.	
• Demonstrates awareness of knowledge related to financial business management, banking, and	
international banking operations.	
 Acquire knowledge of the main functional aspects of financial management and 	
Financial analysis	
.2 Critical and Analytical Thinking Skills	
Skills	

• Harvests ethical considerations and adheres to them in making decisions related to marketing.

Financial and banking business

• Diagnoses international financial issues, including ethical issues, analyzes their content, and proposes

recommendations for their resolution. •

Demonstrates an understanding of the global economy and the impact of social, economic, and cultural factors.

On the management of financial and banking operations

.3 Personal development skills

• Improving the quality and type of real estate financing and increasing productivity

• Realizes that continuous learning and training are an integral part of professional growth and

career advancement

4 Practical skills

• Preparing and providing investment portfolio management

and information technology • Conducts research using various available resources. • Conducts feasibility studies and project evaluations for individuals, institutions, and proposed projects.

Course Description for the Fourth Stage

1. Course name :		
Research Project Graduation		
.2 Course code:		
TOB 514		
.3 Sem	nester/Year:	
First of the academic year 2023/2024		
.4 Date this descrip	otion was prepared:	
2023/9/1		
.5 Available forms	of attendance:	
Weekly class attendance		
6. Total number of study hours/number of units (total	al)	
)30(hours)2(units per week		
7. Name of the course supervisor (if more than one na	me is mentioned)	
Name: Dr. Ali Hamid Hindi Al-Ali alih.alali@uokufa.edu.iq Email		
8. Cc	ourse objectives	
Developing the ability to think critically and solve research problems through analysis. Developing the student's ability to process data and interpret results. Developing the ability to communicate effectively with academic research communities by developing the ability to write research and discuss it orally. Developing data collection and analysis skills, and developing the ability to identify the factors influencing the research phenomenon (study project). Developing students' critical thinking skills by enhancing their ability to analyze and evaluate information and pose research questions about it. 9. Teaching and learning strategies The research project course is a course in which students are taught the principles and values that govern the practice of scientific research, with		
the aim of providing them with the knowledge and skills necessary to conduct sound scientific research in an ethical and responsible manner.		
This is done by introducing them to the ethics, goals, and principles of scientific research, in order to present a research project that fulfills the aspirations of the student, the professor, and the university.		
Course structure		

Evaluation method:	Learning method	Name of unit or topic	Week Hours Required Learning Ou	itcomes Submit	ting a
