:(1)Introduction

The financial and banking sector is one of the main pillars in the process of economic and social growth and development, as attention to financial institutions and monetary and financial markets contributes a lot to encouraging savings and investment operations and achieving national product. Also, the banking system and its diversity and expansion of banking services and not being limited to the traditional ones (deposit and credit), but rather to practice most of the work that he can do, such as investing in securities, providing financial and banking advice, conducting a feasibility study, paying customers' liabilities, collecting their dues, working by leasing, buying goods for others, and other works. The financial and banking sector's dependence on the data of the scientific and technical revolution that the world is witnessing today, especially in the field of hardware, computers and software, and in the field of communications and transportation, will greatly facilitate communication between savers and investors and between producers, sellers and consumers. Banks have begun to open local and international banking branches and outlets, in addition to their use of automated, home and portable banks, all of this has contributed to accelerating the process of balanced economic and social development.

*(5)The Scientific Plan of the Department of Banking and Finance for the
year 2023-2022*

: (2) About the department

This department was established in the academic year 2007/2008 and aims to prepare financial and banking cadres that contribute to the development of the banking system, capital markets, insurance companies and other financial institutions in the public and private sectors. The department awards a bachelor's degree.

•Academic skills and educational outcomes of the department:

As a result of the availability of the teaching staff with great academic qualifications with a “professor degree” and a teaching staff consisting of a professor number 3, an assistant professor number 10, a teacher 6 and an assistant teacher 2, which makes the department has great potential in providing the educational process with financial and banking expertise and specializations. This will lead to the graduation of batches with qualified scientific and practical capabilities and capabilities towards development and development.

•Infrastructure of the department (halls, laboratories, offices, The department has ten classrooms, and the actual need is ten, while the teaching rooms are only 9.

•Teaching and administrative cadres:

In the department there is a professor (3), an assistant professor (10) and a teacher (6), an assistant teacher (2) with two lecturers at a teacher's rank. There is also a department secretary and a service employee.

Available educational resources and resources:

There are blackboards, whiteboard pens and squeegees only in each classroom, and there are many books and scientific publications of specialization in the college library.

•Job opportunities available to graduates of the department: There are great job opportunities for graduates of the department, which are government banks, which can attract the total number of students, which amount to 90 male and female students, as a down payment in the financial and banking sectors, as well as financial insurance companies, banking companies, money transfer companies, and companies financial investment.

•Prospects and future plans of the department.

There is a proposal that was sent to the Ministry regarding the opening of a higher diploma in financial analysis, in addition to the creation of a doctoral study in financial and banking sciences.

(6) *The Scientific Plan of the Department of Banking and Finance for the year 2023-2022*

:(1-3) Seeing the oath

Creating a scientific background capable of enriching university life to build capabilities, develop and prepare financial and banking cadres. These quality cadres will actively participate in developing and highlighting the administratively qualified levels in the financial and banking sectors. The department aims to prepare graduates in the field of financial and banking sciences through research and studies that are prepared by the faculty, including professors and lecturers, in addition to following up on the appointment of the first graduates in financial and banking institutions to be appointed in construction and development.

:(2-3) Message

Working on providing scientific, research, advisory and educational services in light of the current and future needs of society and seeking to develop the knowledge base in the field of financial and banking sciences in general and the private sector in particular in order to increase its contribution and role in the country's economy.

:(3-3) Objectives of the department

Preparing cadres specialized in financial and banking sciences capable of serving the governmental and private sectors, and then society.

Providing research, consultations, and financial and banking feasibility studies to solve practical and technical problems needed by governmental and private institutions and projects.

Work on developing the banking system, financial markets, tax system, and other financial and economic institutions operating in the country.

Spreading financial and banking awareness in the community.

- Seeking to invest the relations of joint cooperation between the corresponding scientific departments in research and postgraduate studies.

- Develop and develop the financial and banking skills and capabilities of the graduates of the department.

- Instilling good values and morals in students and avoiding wrong and educational behaviors.
